Professional Summary

Design engineer with 3+ years owning interfaces from interaction decisions through production TypeScript. Strongest in React, Next.js, and component systems, with enough backend range to ship usable products without waiting on a separate designer or API owner. Values clarity, accessibility, and product thinking over visual craft for its own sake. Based in Berlin; ready to relocate anywhere in Europe at short notice.

Technical Skills

UI Systems: React, Next.js, TypeScript, Tailwind CSS, Astro, Angular, shadcn, DaisyUI, component libraries, prototyping.

Product Craft: Information hierarchy, accessibility, usability with non-technical users, Figma-to-code translation.

APIs & Delivery: Node.js, Nest.js, GraphQL, REST APIs, Git, GitHub Actions, Playwright, Vitest.

Languages: Spanish (Native), English (C1), German (A2).

Featured Project

Multi-tenant RAG Conversational Agent | *Graduation Thesis (built into Agroshow)* 2024–2025

- Designed and built a human-in-the-loop operator dashboard that turns dense AI oversight workflows into a clear, usable interface.
- Owned monitoring UI across **5,000+** data points from concept to production inside Agroshow, without a separate designer.

Professional Experience

Inmobiliaria Terepaima | *Software Engineer (Freelance)* Sep. 2025–Present

- Owned a central admin portal end to end, from interface decisions through Angular/TypeScript UI and Nest.js API integration, boosting team speed by **50%**.
- Translated raw datasets and internal workflows into polished, production-ready UI components, cutting iterative feature time by **30%**.

Agrotendencia / Agroshow | *Software Engineer (Freelance)* Feb. 2025–Aug. 2025

- Led the visual and interaction redesign of a directory platform with Astro and Tailwind, cutting page-load latency by **80%** on heavy client-side datasets.
- Rebuilt information hierarchy from non-technical user feedback (primarily older farmers), applying accessibility practices and cutting hosting costs by **90%**.

Avilatek | *Frontend Engineer* Jun. 2023–Jan. 2025

- Partnered with designers and PMs on production e-commerce layouts and data-rich B2B dashboards (**+25%** engagement).
- Built and tested shared component libraries with Playwright and Vitest, reducing interface bugs by **40%**.

Education

Universidad Católica Andrés Bello (UCAB) Graduated 2025

B.S. in Computer Engineering (Software Development Specialization) Caracas, Venezuela

Colegio San Ignacio de Loyola 2020

High School Diploma in Sciences Caracas, Venezuela

Interests

Swimming, cooking, and playing music.
